EXPERIENCE

Full Stack Developer | Dealerpull   *Mar 2021 - Present*

- Spearheaded the development, implementation, and support of a comprehensive web architecture for a multi-tenant SaaS platform, resulting in a 30% increase in the number of tenants on the platform
- Expertly designed and constructed a scalable REST API, seamlessly integrating the front-end user interface
- Successfully upgraded the existing codebase using the latest technologies to enhance performance, design, stability, and security, resulting in a 25% improvement in overall performance and time efficiency
- Efficiently deployed and designed the database, ensuring adherence to proper database design standards
- Wrote comprehensive and thorough end-to-end tests to prevent regressions using the Cypress testing framework, resulting in a significant 90% reduction in the number of regressions
- Collaborated closely with the business team to ensure solutions aligned with business requirements and needs

Freelance Developer | Codementor   *Mar 2020 - Mar 2021*

- Codementor is an online platform that enables developers to quickly connect with experienced professionals for personalized, one-on-one support and mentorship to enhance their coding abilities and knowledge
- Successfully collaborated with over 125 clients, consistently utilizing high-quality coding conventions to resolve their issues, ultimately achieving a 100% satisfaction rate and earning a 5-star rating
- Assessed and assisted clients with issues in React, Angular, TypeScript, HTML & CSS, JavaScript, and SQL
- Earned the distinction of "Codementor of the Week" 13 times for consistently delivering top-performing mentorship, resulting in a 57% increase in the number of clients seeking mentorship

Front End Software Developer Intern | ComQi   *May 2019 - Aug 2019*

- Developed and implemented front-end software components for a cloud-based content management solution, gaining valuable experience in writing high-quality, well-documented code through code reviews
- Contributed to the improvement of the application's media content upload process, resulting in enhanced efficiency and design, and earning positive feedback from the design team and customers
- Worked with the front-end team to bring product designs and requirements to fruition, consistently delivering high-quality software that exceeded project goals and expectations

Full Stack Developer Intern | PHRI   *Sep 2018 – Jan 2019*

- Created full-stack ASP.NET web applications for large budget drug research management projects
- Utilized Agile methodology to closely collaborate with business analysts and other developers in scrum teams
- Applied my expertise in C#, JavaScript, HTML & CSS, and SQL to program functional web applications
- Leveraged knowledge of Object Oriented and .NET concepts to troubleshoot and introduce new features
